
DISCLOSURE ON SLIP RESISTANCE FOR PUBLIC BUILDINGS

As a reference standard for slip resistance in public buildings AGGLOTECH adopts the German BGR 181 standard, which clearly indicates by category the correct type of surface for each environment.

CLASS R9 Suitable for use in:
Degree of slope Halls, stairs, corridors and flooring in general in:
inclination 6 - 10° Schools, offices, shops, clinics and hotels.

CLASS R10 Suitable for use in:
Degree of slope Flooring in toilet facilities, changing rooms and laundries, self-service or bar
inclination 11 - 19° counters.

CLASS R11 Suitable for:
Degree of slope Flooring and stairs in outdoor environments.
inclination 20 - 27°

CLASS R12 Bush-hammered suitable for:
Degree of slope Flooring and stairs in outdoor environments.
inclination 28 - 35° External sloped flooring.

AGGLOTECH finishes satisfy the requirements of the BGR 181 and DIN 51130 standards as follows:

Honed and impregnated surface: R9

Honed and impregnated surface: R10

Brush-finished surface: R9

Bush-hammered and brush-finished surface: R11

Bush-hammered surface: R12
